Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 03 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Detailed Action

- I. Office Action dated June 3, 2004 is vacated. A restriction / election requirement is set forth below.
- II. Rejection of claims 1-10 under statutory double patenting will not be maintained in light of letter filed 11/3/04 will not be maintained. Examiner agrees that scope of instant claims and scope of claims in USPN 6656928 differ. For this reason, USPN '928 does not anticipate instant claims.
- III. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to composition comprising a corticosteroid plus an imidazole, plus calamine, classified in class 514, subclass 167,171,396.
 - II. Claims 11-20, drawn to a method of treating diaper rash, intertrigo, atinea infection, seborrhea, psoriasis, or lichen simplex chronicus with a composition comprising a corticosteroid plus an imidazole, plus calamine, classified in class 514, subclass 167,171,396.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case product claimed can be used in a materially different process.

Art Unit: 1616

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: an invention comprising a corticosteroid plus calamine plus an imidazole.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, an invention comprising a corticosteroid plus an imidazole is generic.

Applicant is advised that a reply to this requirement must include an identification of the species (Examiner is requesting that applicant elects a specifically named or completely defined corticosteroid and a specifically named or completely defined imidazole. In addition, Examiner is requesting that Applicant specifically name or completely define additional ingredients desired for the elected invention. Additional ingredients are generally listed in "further comprising" claims. If additional ingredients are not specifically named or completely defined, examiner will consider claims having additional components as non-elected claims.) that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. Examiner discussed election on 1/5/06 with Attorney Hejlek, but discussion did not yield an election.
